

Student & Remote Workforce Camps Overview

PLACES TO LEARN AND LIVE

Student & Remote Workforce Camps Industry Overview

Stack Modular was designed to manufacture and deliver quality Student & Remote Workforce Camps projects across the world. Our rapid construction process allows us to be a preferred partner for the Student and Remote Workforce sectors. Our end-to-end manufacturing process allows us to deliver solutions that are safe, high-performing, and scalable. Stack Modular is ready to deliver and design buildings that create places for people to live and work. The challenges of site access, availability of skilled labor and resources, and

the complexity of the building environment require new and innovative solutions for the sector. Generally, these projects are required to be built in busy locations and with accelerated timelines. With modular construction, we can deliver housing quickly and with quality. With a turn-key construction process, we simplify complex builds and turn ideas into beautiful projects across the world. From initial idea and designs to final install, the Stack team provides an end-to-end solution.

RAPID SOLUTIONS FOR
IMPORTANT PROJECTS

Delivering spaces for people to live, work, and learn.

OUR CAPABILITIES

Our Firm, Our History, Our Legacy

With 12+ years of delivering modular projects accross the world, we know what it takes to get a project from design to construction. With 100+ years of construction experience, 5,000+ employees, and 750,000 sqft of manufacturing capacity, we are the preferred partner for the student and social housing sector. When

looking for a modular partner for your project you need a partner who has been there and done that. Who has built projects and has a defined and tested process. A partner that has the size, scale, and specialization to solve problems and bring units to market on budget, on time, and safely.

INDUSTRY EXCELLENCE

With over 100+ years of construction excellence, you can count on our team to take pride in delivering your next project.

WHAT WE BRING

We Specialize In Creating Buildings for Student and Remote Workforce Camps

With our modular construction approach, we can deliver beautiful, functional, and cost-effective projects to learn, live, and play. In a time where labor, material costs, and building complexity are all raising our end-to-end approach brings certainty to critical builds. From initial design and discovery, we take care of every detail. Our team works to understand your project needs. We balance budget and beauty to achieve project objectives for all stakeholders. Our technology allows an owner to walk through a building before it is manufactured and installed on-site. Bringing visibility and transparency to each module.

HOW WE WORK

Our Process

As a design-assist firm, we start with the idea and the project opportunity. We work collaboratively with the project owner to define what can be built, for how much, and in what timeline. We invest valuable time in our discovery process to work out every detail and element for a student and remote workforce camp project. It is critical that before we move into the manufacturing process that each element is defined and organized.

Our Approach to Student & Remote Workforce Camps

We are not simply just a modular builder but rather a true construction partner helping to bring student and remote workforce camp projects to life. Each building needs to perform to create experiences for people who live there. We think through every step in the way we build.

Creating Places for People to Live, Learn, and Laugh

We create safe, high-performing, and scalable solutions for the social and remote workforce camps sector. We understand that these buildings need to equip their occupants with a safe environment that is cost-effective yet personal. We can deliver on this promise because of our size, scale, and experience.

OUR BEST BUILD YET

The Stack Advantage

We were built for this. Our team and process is established to deliver rapid construction solutions at scale. With over 750,000 sqft of manufacturing capacity, 5,000+ employees and over 100 years of traditional construction experience and 13 years of modular history, we are built to deliver.

Our technology, team and process leads the industry and is counted on to deliver complex and critical projects all across the world. The Stack Advantage is the unique collaboration of the traditional and modular construction methods, backed by experience, technology and scale.

Through the material we use, the team we employ and the process we have defined Stack Modular is the construction partner needed to deliver rapid quality at scale.

Watch

We are built to deliver for the student & remote workforce camps market. As an organization, we have created our infrastructure and expertise to simplify construction and be solutions-focused for our partners.

We have the ability to start from an idea and transform a concept into a built reality. We love to collaborate at the beginning and bring our experience and expertise to work for our partners. If there are projects that need to be built and challenges that need to be solved, we would love to begin a conversation and see where we can bring the Stack Advantage to work. We are personable, professional, and ready to get to work on our next project. Please feel free to reach out to start the conversation.
